

Peace — What We Need From You

The Peace store is built and tested: storefront, admin panel, checkout, payments, shipping, returns and marketing. To go live, we need the accounts and details below.

Without any keys the store already runs: Cash on Delivery, manual shipping, in-app notifications. You (or we) enter every key yourself in the admin panel → **Integrations** — stored encrypted, live the moment you save, with a Test connection button.

#	Item	Client provides	Status
1	Hosting	VPS (e.g. Hostinger KVM 2, Ubuntu 24.04, India/Asia data centre) + domain	✔ ready to deploy
2	Payments	KYC-approved Razorpay account, live API keys, webhook secret	✔ built
3	Courier	BharatShip login + pickup warehouse	✔ built
4	Login	Keep our Firebase project <code>peace-texocore</code> , or provide their own	✔ running
5	Email	Free Gmail (App Password) or Brevo account + sender address	✔ built
6	SMS	Provider (e.g. MSG91) + DLT sender & template approval	🟡 small hookup
7	WhatsApp	WhatsApp Business API (Meta) + approved templates	🟡 small hookup

All hosting runs on the VPS — web, API, database, product images and videos. SSL, daily backups and the Cloudflare CDN are free.

Business details

- Official logo — SVG + PNG (light and dark), square icon, brand colours (*current logo is a placeholder*)
- GSTIN, HSN codes, legal name and address for invoices
- Return, refund, privacy and shipping policy text
- Support email and phone
